

Garbage situation in this building

You might have noticed the towering piles of waste in our neighbourhood. The reason for this is our failure to organize our garbage according to the orders of Karnataka High Court for waste segregation at source:

Houses and offices should use green bin for putting wet (biodegradable) waste, red bin for hazardous and sanitary waste and a reusable bag for dry (non-biodegradable) waste.

With immediate effect the BBMP will **only collect household waste that is segregated** according to following categories and kept in an appropriate container.

Waste in plastic cover/trash bags will no longer be collected.
Please educate all house members, domestic help accordingly.

For assistance please contact building management.
