

This is a Zero Waste building.

Waste segregation is a good start to cleaning up our city. However, in the long run, this is not enough. Zero Waste is easy and practical. It eliminates "dustbins" and trash bags. Please follow these rules when disposing of waste in this building.

Compost: Anything organic and vegetarian

Any vegetarian (including eggs) kitchen waste, cooked food, or garden waste.

Organic: Anything organic

Vegetarian bins are emptied into the compost daily. Line these bins with biodegradable bags or newspaper.

Non-vegetarian bins will be given to the BBMP. Line these bins with newspaper.

Dry waste: Clean, dry recycleables

There is one unlined bin for each material: **paper**, **plastic**, **metal**, and **glass**. There is a separate bin for **e-waste**.

Wash, rinse, and dry recycleables before putting them in the bin. **Do not** put these materials in any other bin.

Reject waste: Sanitary/hazard waste

Use bins in washrooms for **used tissue**, pads/tampons, sharps, and uncategorized waste like dust and broken glass. Given to the BBMP in paper with a **red "X"**.

Do not line these bins.

Waste can **never** be placed in plastic cover/trash bags. Please educate all tenants and domestic help accordingly.

For assistance please contact building management.
